Hardware Keyloggers

**Advantages:**
- Begins to log the moment a computer is turned on
- Captures credit cards, chats, emails, websites
- Able to intercept logon passwords
- Undetectable by security software
- They Work on all platforms Window/Mac/Linux

**Disadvantages:**
- Need to go through logs of all keystrokes
- Logs must be manually retrieved
- Easy to spot if user knows what to look for
- Shortage of features

Spotting a Hardware Keylogger

Blowup
Software Keyloggers

**Advantages:**
- Invisible to the human eye
- Remote installation possible
- Can send captured data live to anywhere
- Captures credit cards, chats, emails, websites
- Can activate & record PC camera and audio

**Disadvantages:**
- Can be detected by SpyCop & some malware software
- Can cause conflicts on your computer
- Spy software developer has access to your PC
- Transmission can be intercepted by others
Admissible in some court systems as evidence

**Countermeasures**

- Get a spy software detector like [www.spycop.com](http://www.spycop.com)
- Password protect your computer logon, even at home
- Deny access to the room your computer is in
- Visually inspect where your keyboard is plugged in
- Don’t use publicly available computers
- Auto form fillers may prevent capture of passwords
- Avoid typing credit card #’s if you can order via phone
